

BGC GROUP, INC. DATA PRIVACY PROGRAM POLICY STATEMENT

BGC Group, Inc. (“BGC” or “we”) has approved the following global data privacy program policy statement with respect to BGC and its subsidiaries.

The following policy reflects BGC’s commitment to data privacy on a global basis with respect to all subsidiaries and business lines and forms part of its governance standards.

Our Commitment

BGC is committed to conducting its business in line with the right to privacy set forth in the Universal Declaration of Human Rights (Article 12).

As such, we are committed to handling personal information responsibly and recognize the privacy rights of persons involved in our business dealings. Confidentiality and protection of customer and employee information are fundamental responsibilities. We take these matters seriously as we provide services globally to our customers and protect one of our most important assets: our customers' trust.

Our Security Measures

We maintain administrative, procedural, technical and physical safeguards that are designed to protect against loss, misuse, unauthorized access, disclosure, alteration, or destruction of the personal information we collect in conducting our business. We utilize security measures and a manual monitoring of employee business communications to endeavor to protect against data leakage, unauthorized access to data or data leaving our network. The measures we may take to provide levels of data protection may also include approved standard contractual clauses, intragroup agreements, and other contractual measures designed to cause recipients of personal information to protect it.

Our Data Privacy Program

The Privacy Office is responsible for creating a culture of data protection awareness and embedding standard practices globally. We have a dedicated Head of Privacy and Data Protection who reports to senior management. The Privacy Office interprets privacy regulations and facilitates the development, implementation, and maintenance of written policies and procedures while monitoring program compliance in addition to investigation and tracking of privacy and data protection incidents and breaches.

The importance of data privacy and confidentiality is reflected in our Data Privacy Program, including the following:

- Regular employee training and education on the General Data Protection Regulation and privacy principles in applicable jurisdictions.

- Written policies and operating procedures on data privacy and request management, including our internal employee privacy policy and our privacy statement located at www.bgcg.com/corporate-responsibility/privacy/ or a successor site.
- Ongoing review and updating of our Data Privacy Program and related processes to align BGC with legal requirements and industry standard practices.
- Compliance with data subject requests to access, correct and delete personal information and to opt out of certain processing of their personal information in accordance with applicable law.
- Establishing mechanisms for data subjects (employees and clients) to raise concerns about their personal information and privacy as well as a right of access to personal information, to correct or amend such personal information and the right to request deletion of such personal information.
- Clear and effective governance, including escalation procedures around data privacy matters which are outlined in communications and reports to senior management and, as appropriate, to BGC's Board of Directors.
- Prompt and responsive investigations of data privacy violations and/or breaches and any required reporting and/or corrective actions, including notifying affected clients, as necessary.
